

**The Knowledge Exchange Partnership Limited  
on behalf of  
The Scotland Patients Association**

**1-Day National Conference**

**"Drugs and Alcohol Addiction: what can we learn from patients  
and their family?"**

**Tuesday 18<sup>th</sup> March 2014**

**Hilton Hotel, 1 William Street, Glasgow, G3 8HT**

The Scottish Government's national drug strategy "The Road to Recovery" stressed the significance of learning from the lived experience of people recovering from drug problems and their families to help improve the outcomes of treatment, care and services for others. This conference provides an opportunity to learn at first-hand from people who engage with and use addiction services as well as hearing from service providers and leaders of national organisations who are delivering the Road to Recovery strategy in Scotland.

You will see from the Programme that we have a range of excellent speakers who are committed to providing a first class service to those affected by drug and alcohol addiction and hope that you will book your place at the conference.
